

Planning under Uncertainty in Energy Markets

Topics

- Integrating economics, engineering, mathematics and optimization to address issues arising in the energy markets of today and the future
- Models for long-term and short-term analysis of energy and transport systems
- Optimization and equilibrium models
- Applications of stochastic optimization

Organizers

Organized by FME NTRANS – Norwegian Centre for Energy Transition Strategies

- Endre Bjørndal, NHH
- Mette Bjørndal, NHH
- Stein W. Wallace, NHH
- Stein-Erik Fleten, NTNU
- Asgeir Tomasgard, NTNU
