

Group Session

Seeking closer Collaboration between Campuses

Groups

- Group #1 (xx leads):
 - Introductory programming/OOP courses
- Group #2 (Hallvard leads):
 - Software engineering - possibly combined with database courses

Questions

- How are we teaching such courses today?
- What can we learn from how the courses are taught at other campuses?
- How can we collaborate to improve the quality and/or reduce teaching workload :
 - Collaboration on teaching material (lectures/mini-lectures, tutorials, ...)?
 - Collaboration on teaching activities (exercises, projects, ...)?
 - Collaboration on exams?
- Could new infrastructure be beneficial?
