Keynote Speech

Democracy, Diversity and Design - Sharing experiences from an interdisciplinary project

Prof. Dr. Natali Helberger, Institute for Information Law, University of Amsterdam

*A team of legal scholars, communication and computer scientists from the University of Amsterdam and RTL have worked on a project that translates **insights from democratic theory into concrete metrics** that can help to assess the performance of news recommenders. In my keynote I would like to present some of our work, and draw some lessons for future work on **'diversity by design'**.*

Thanks to all contributors and participants!
