

Brøset

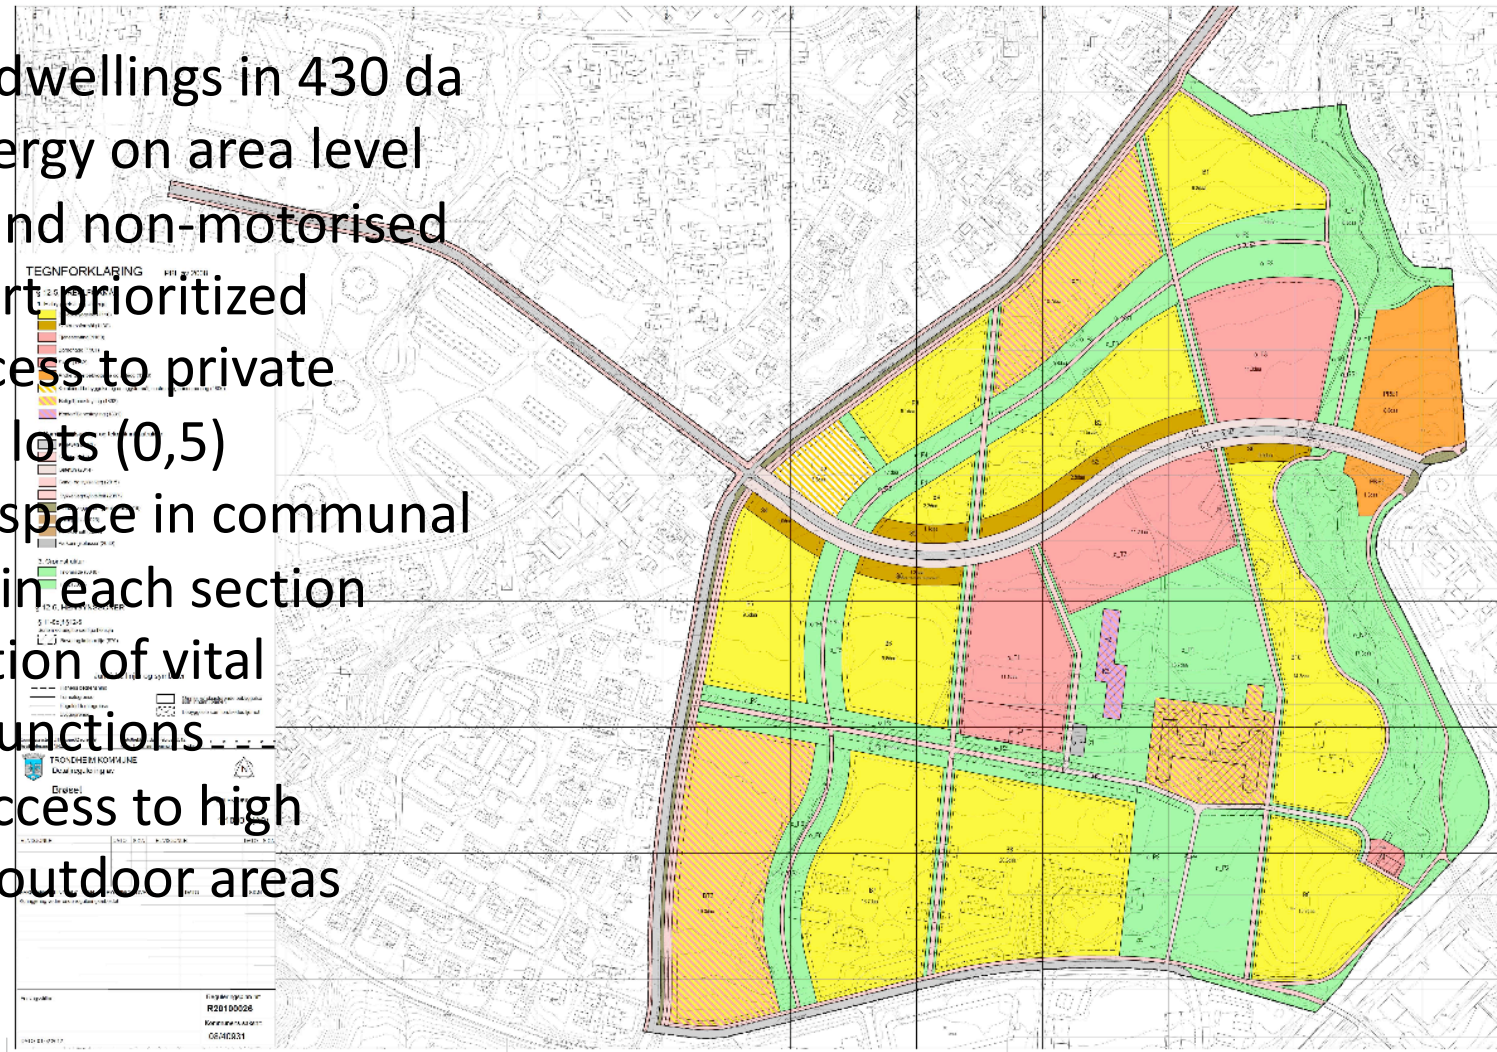

From master plan to reality

The area plan in a nutshell

- 1600 + dwellings in 430 da
- Plus energy on area level
- Public and non-motorised transport prioritized
- Low access to private parking lots (0,5)
- Shared space in communal houses in each section
- Integration of vital public functions
- Good access to high quality outdoor areas

- Questions remain:

- How to secure environmental targets that go far beyond current legislation?
- How to motivate people to share the vision and move to Brøset?
- Which models for developing and organizing areas with high ambitions are possible?
- What are their strengths and weaknesses?
