

Recommended literature for Sustainable Architecture.

You can find this literature gathered at the library. Under AAR4532. We are allowed to borrow them for only one day.

Literature	Editors/Authors
Towards 0-impact Buildings and Built Environment.	Ronald Rovers et all
Time to eat the dog? The real guide to sustainable living	Robert and Brenda Vale
How buildings learn	Stewart Brand
Heating, Cooling, Lighting. Sustainable design methods for architects.	Norbert Lechner
A life cycle approach to buildings.	Holger König et all
Net zero energy buildings	Karsten Voss Eike Musall
Energy Manual, Sustainable Architecture	Hegger, Fuchs, Stark, Zeumer.
Energy and Architecture- Improvement of energy performance in existing buildings.	Haase, Wyckmans, Solbraa
The ecology of building materials	Berge, Bjørn
Architectural integration and design, 2011. ISBN: 978-0-415-66971-3 / ISBN: 978-2-940222-46-9	Maria Christina Munari Probst and Christian Poecker
Cities and Form, Hermann, 2011	Serge Salat
Green building: guidebook for sustainable architecture 2010, Heidelberg: Springer. 208 s.	Bauer, M., P. Möhle, and M. Schwarz,
Energy design for tomorrow 2009, Stuttgart: Edition Axel Menges. 367 s.	Daniels, K. and R.E. Hammann,
Cities people planet Urban development and climate change, Wiley, ISBN: 978-0-470-77270-6	Girardet, H.
Energisparing i verneverdige hus. Veileder, ed. E.R. Grytli 2004: SINTEF.	Grytli, E., Fiin gammel aargang.
Renewable energy applications in zero emission buildings – a case study. in Renewable Energy Research Conference 2010. Trondheim, Norway: Tapir Academic Press.	Haase, M. and V. Novakovic.
Improvement of energy performance in existing buildings 2011, Trondheim: Tapir Academic Press. 88 s.	Haase, M., et al., Energy and architecture:
Energy manual: sustainable architecture, 2008, Basel: Birkhäuser. 280 s.	Hegger, M.,
Building performance simulation for design and operation 2011, London: Spon Press. XXIV, 507 s.	Hensen, J.L.M. and R. Lamberts,
The Design Process Demystified, 1997, Oxford: Butterworth Architecture.	Lawson, B., How Designers Think.

<i>Heating, cooling, lighting : Design methods for architects. 2nd ed. Ed, 2001, New York John Wiley & Sons. xvii, 620 p., [2] p. of plates.</i>	Lechner, N.,
The Reflective Practitioner, 1983, London: Temple Smith.	Schön, D.A.,
The Sciences of the Artificial, 1969, USA: MIT Press.	Simon, H.,
Net zero energy buildings – strategies and experiences from the perspective of planners and users, Detail, 192 p.	Voss, K. and Musall, E.
Precedents in zero-energy design: architecture and passive design in the 2007 solar decathlon, 2010, New York: Routledge. XI, 228 s.	Zaretsky, M.,
<i>Design with Climate, bioclimatic approach to architectural regionalism.</i> Princeton University Press, Princeton, New Jersey, 1963.	Victor Olgyay.
<i>Introduction to architectural science, the basis of sustainable design.</i> Architectural Press, USA 2010 (ISBN: 978-0-75068704-1)	Steven V Szokolay.
<i>A green Vitruvius, principles and practice of sustainable architectural design.</i> Earthscan, London 2011 (ISBN 978-1-84971-31—5)	V. Brophy and J. O. Lewis,
<i>Solar heating + architecture – an inspirational guide to the use of solar heating in buildings.</i> Bogværket 2010 (ISBN: 978-87-92420-17-6)	AA VV.
<i>Le Corbusier's Venice Hospital and the mat buildings revival,</i> Harvard Design School, Prestel, Munich 2001	Hashim Sarkis,
The Handbook of Sustainable Refurbishment: Non-Domestic Buildings. ISBN-10: 1844074862	Baker Nick
Energy and Environment in Architecture ISBN-10: 0419227709	Nick Baker and Koen Steemers
Daylight Design of Buildings: A Handbook for Architects and Engineers ISBN-10: 1873936885	Nick Baker and Koen Steemers
Green building certification systems	Thilo Ebert, Natalie Ebig, Gerd Hauser
A life cycle approach to Buildings	Holger Konig et all.
