Content

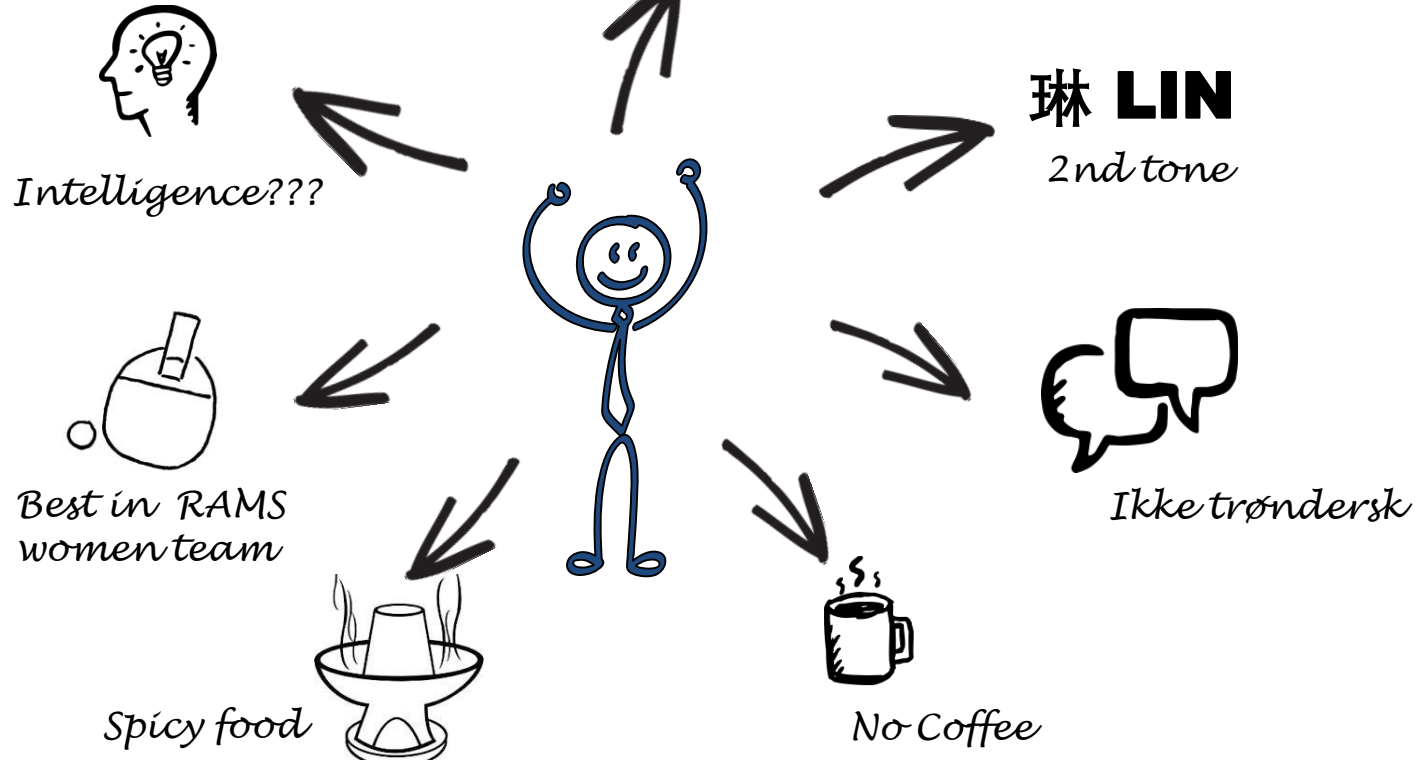

1 Self introduction

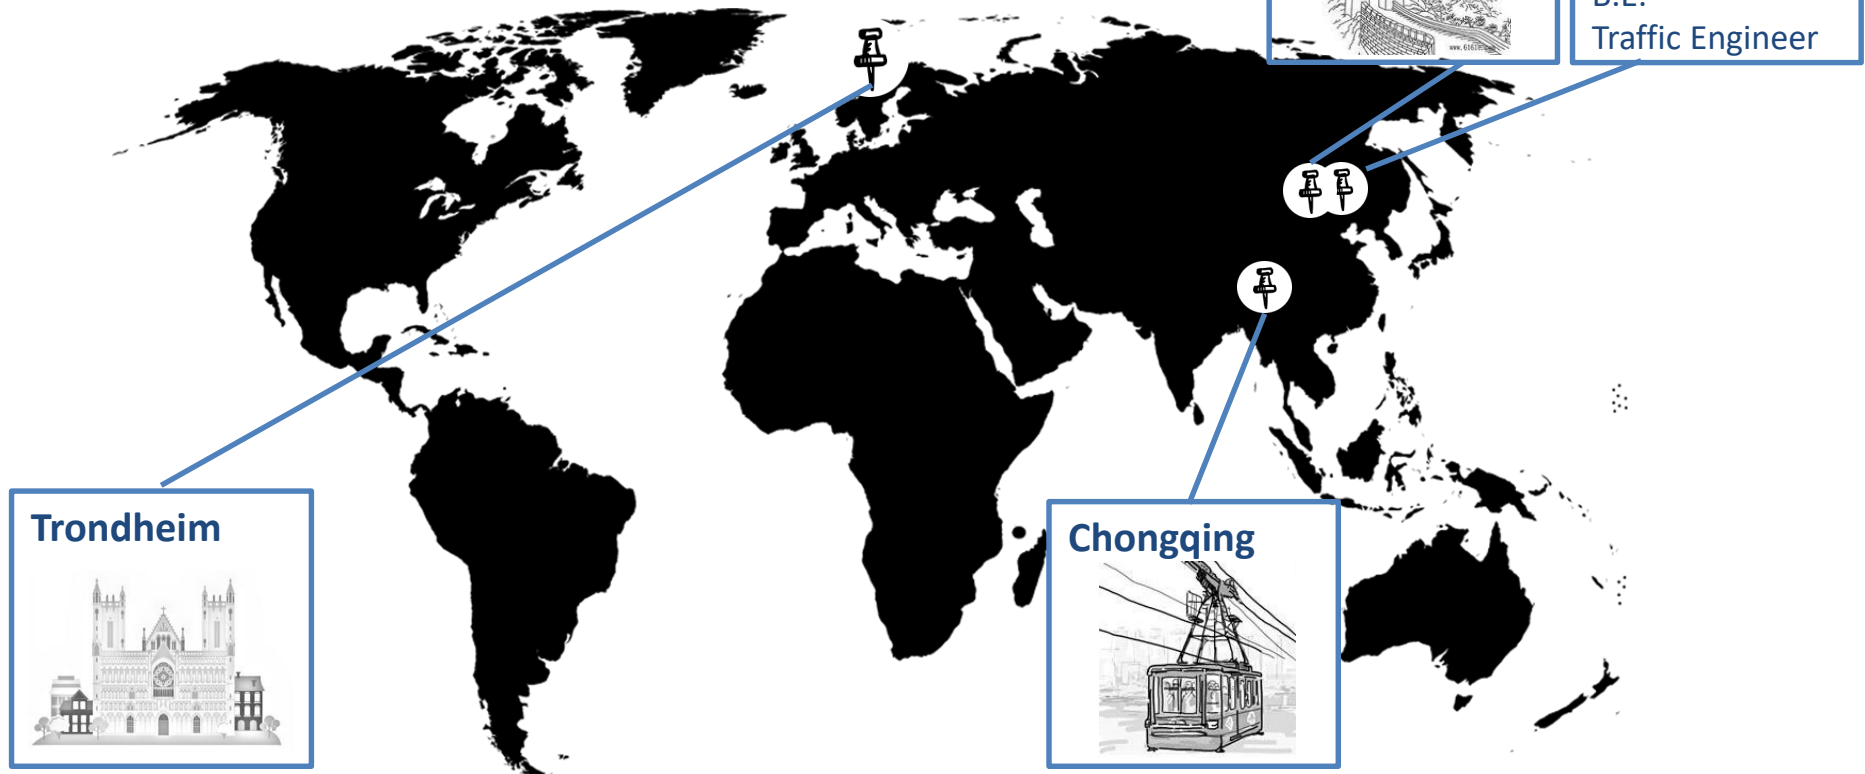

2 Master project

3 PhD project

About me

Road to Norway

Trondheim

Beijing

Work as HR

Tianjing

M.E.

Management

B.E.

Traffic Engineer

Chongqing

Master program

HSE:

Health, Safety & Environment

RAMS:

Reliability, Availability,
Maintenance & Safety

Master project

Mary Ann Lundteign

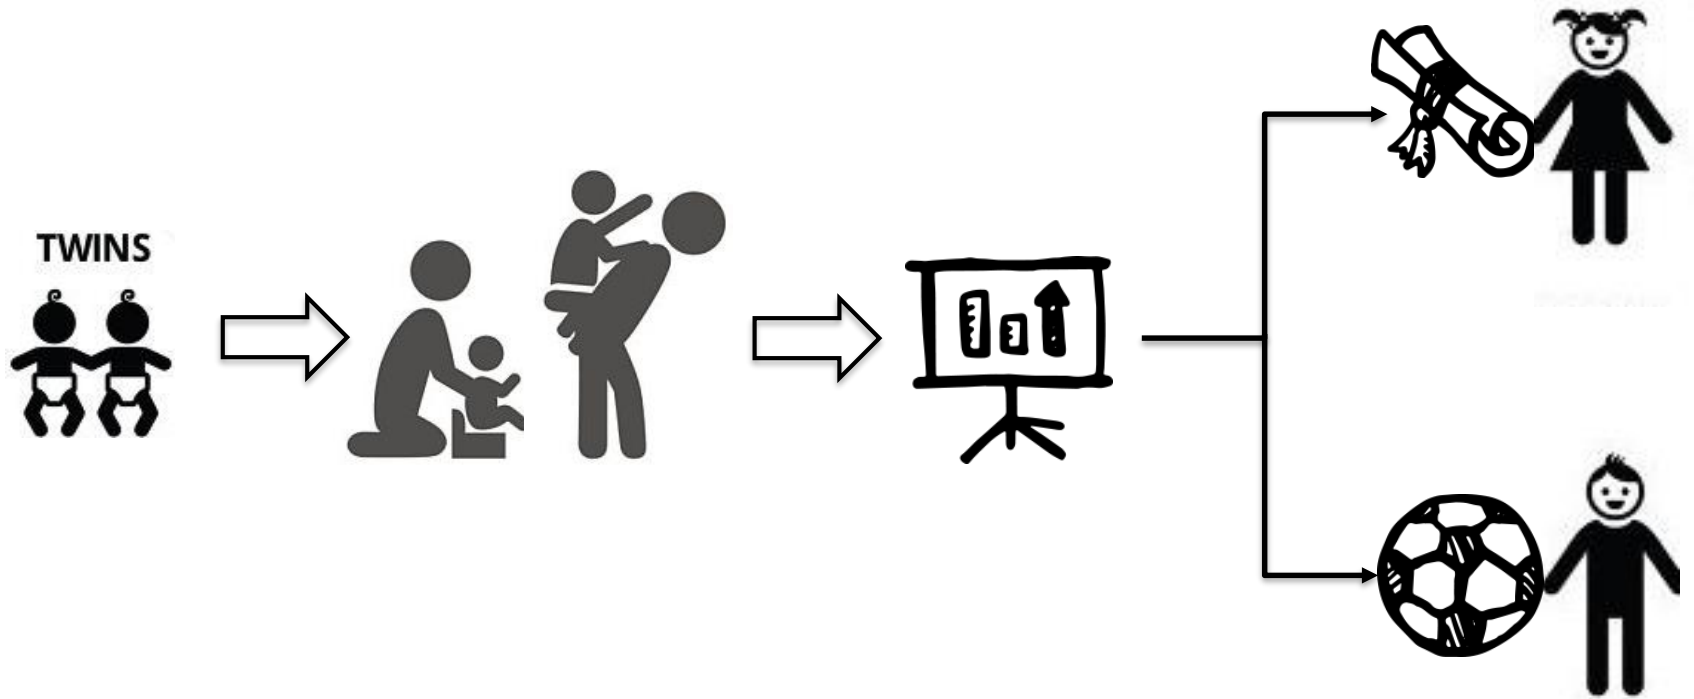

Stein Hauge
Solfrid Håbrekke

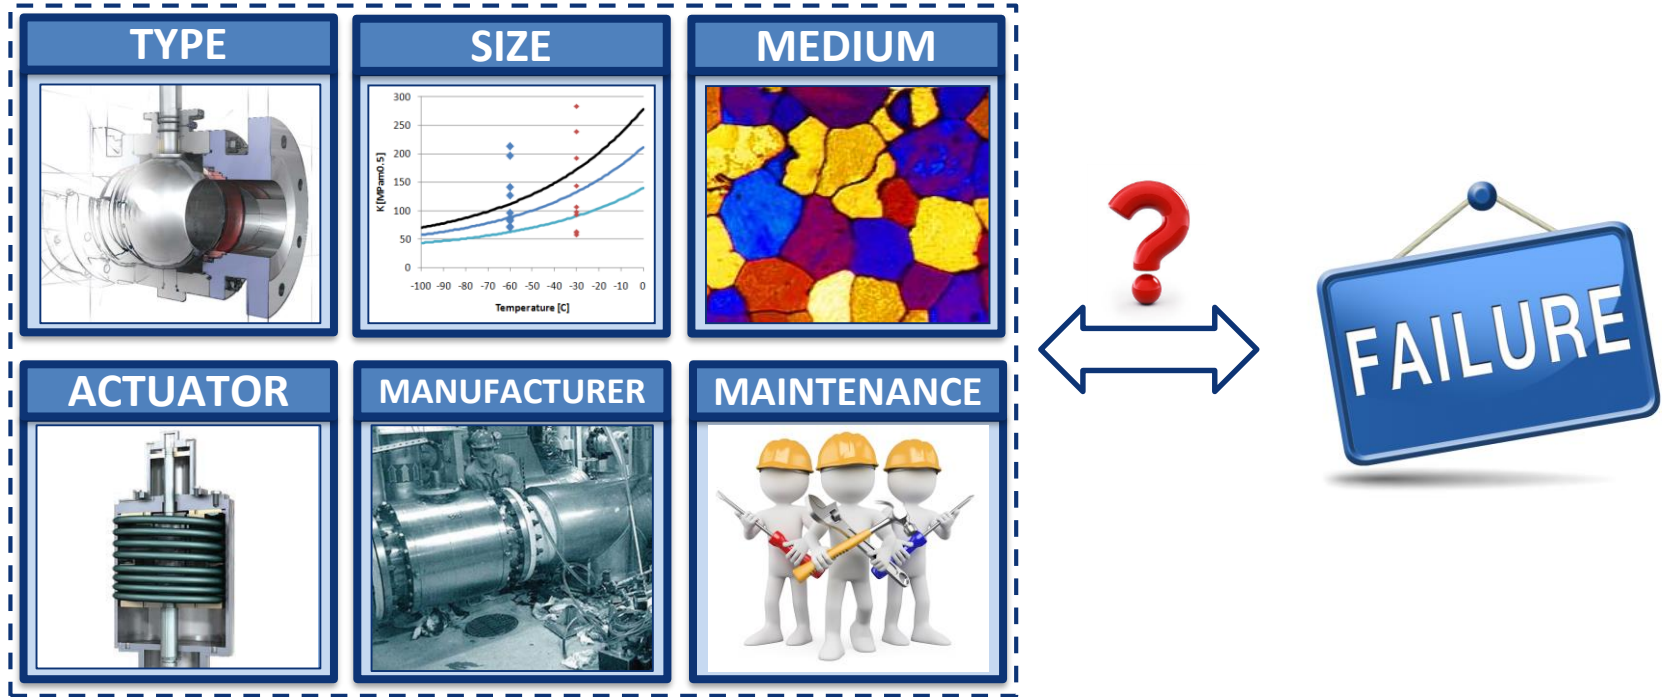

Bjørnar Berg
Espen Sørensen

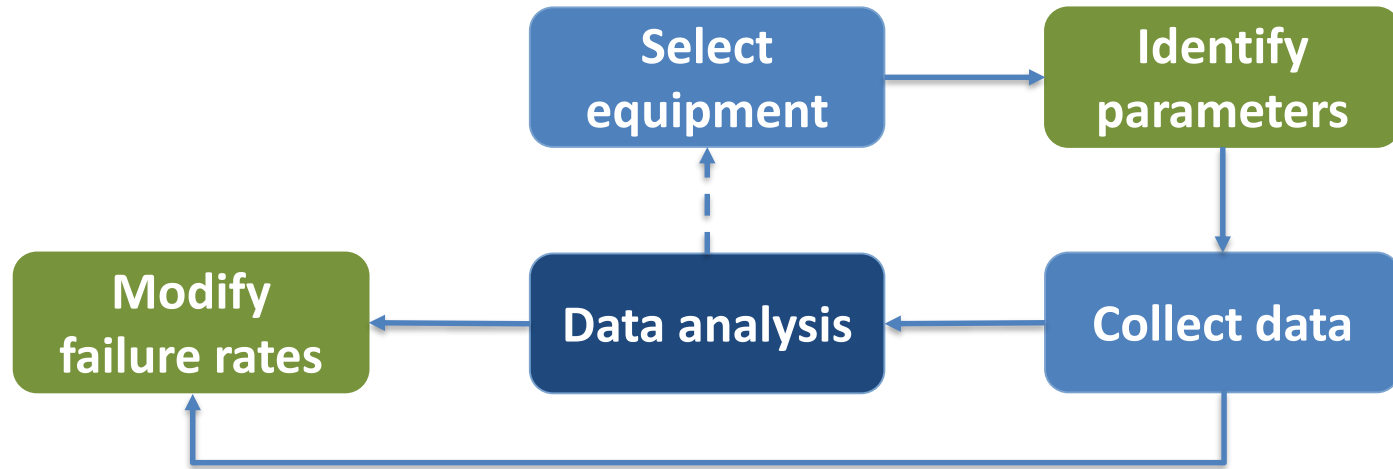

Motivation

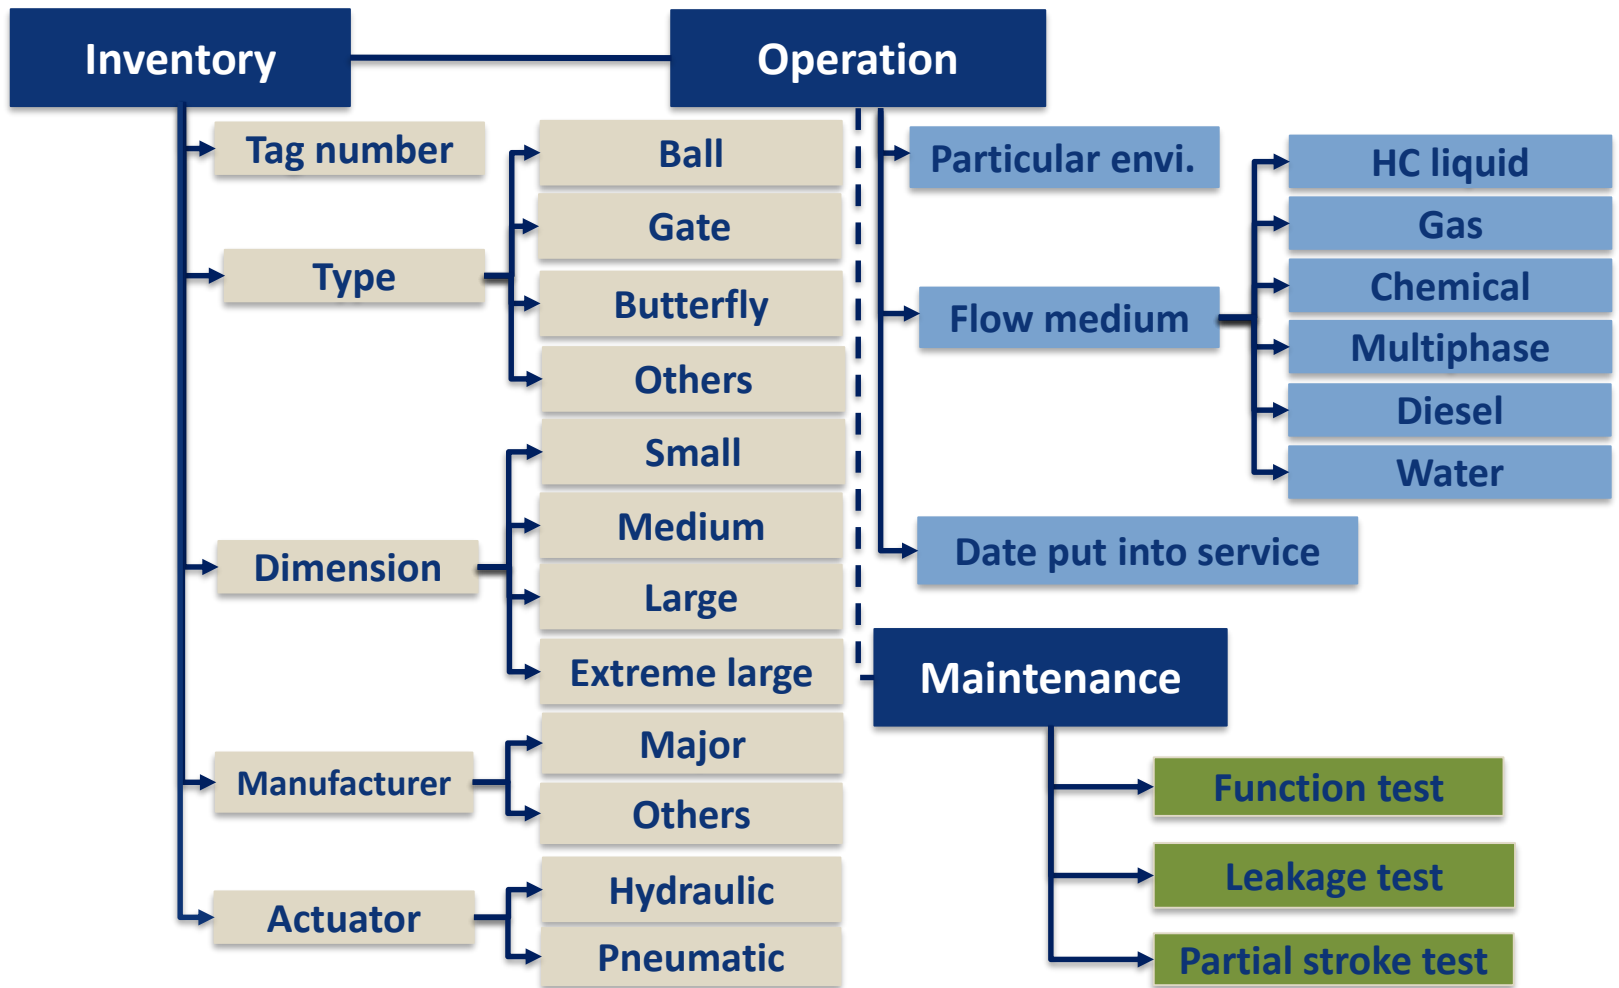

Objectives

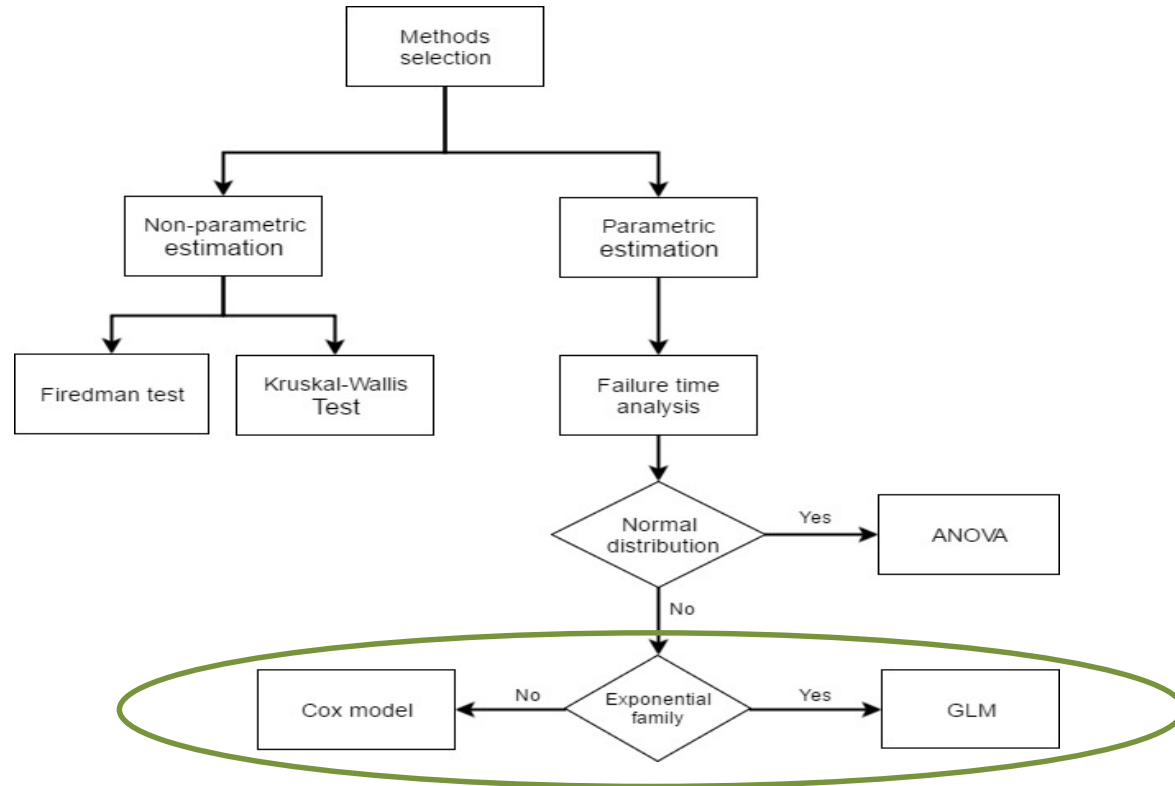

Master project

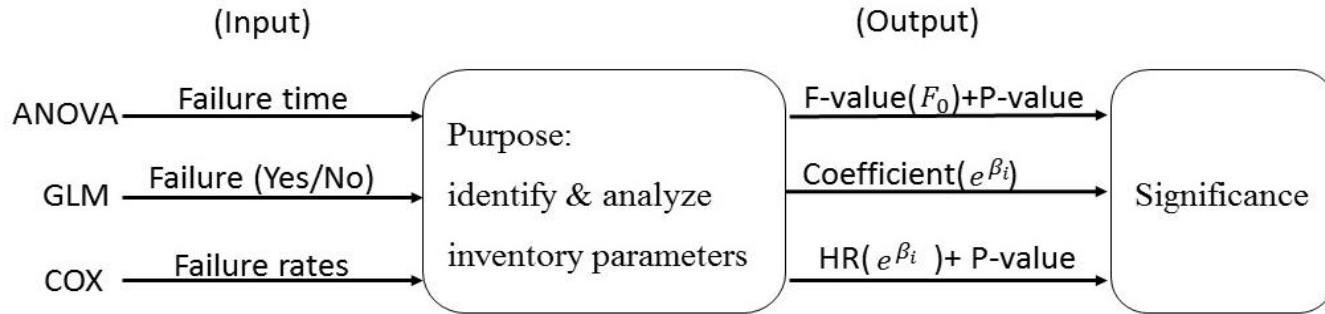

Data analysis

Data analysis method

Methods	Distributions	Criteria	Estimations	Formula
ANOVA	Normal distribution	Failure time	Least squares estimation	$T = \sum b_{ik} x_{ik}$
GLM Model	Exponential family (Binomial)	Failure probability	Maximum Likelihood Estimation(MLE)	$\log\left(\frac{p}{1-p}\right) = \sum b_{ik} x_{ik}$
COX Model	Free-distribution	Failure rates	Partial likelihood	$\lambda_k = \exp\left(\sum \beta_{ik} x_{ik}\right)$

Significant parameter

Stable

Failures

Size

Small

Large

Leakage

NO

YES

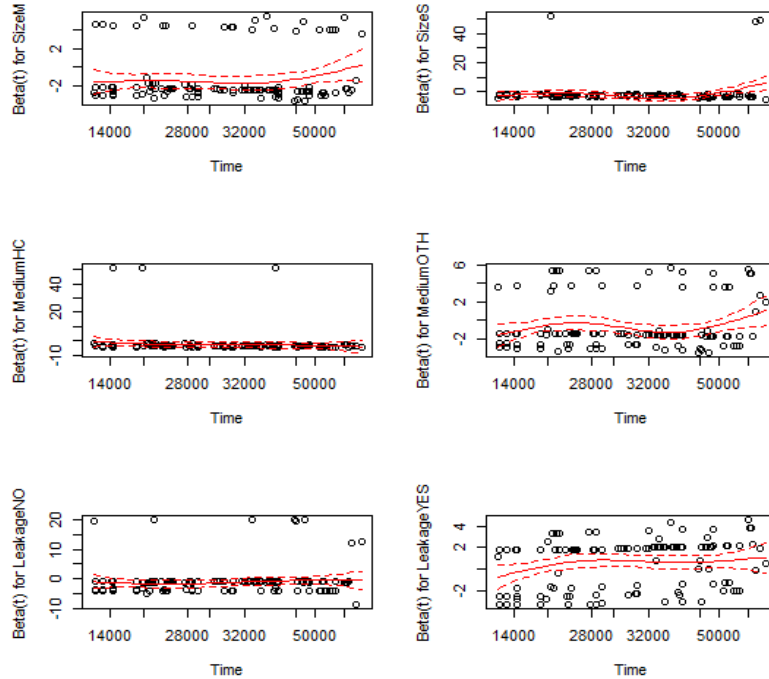

Medium

HC Liquid

Gas

Parameter	Beta	P-value
Size	1.43	4.97E-10
Leakage	0.38	0.86E-03
Medium	-1.27	4.29E-10

Validation

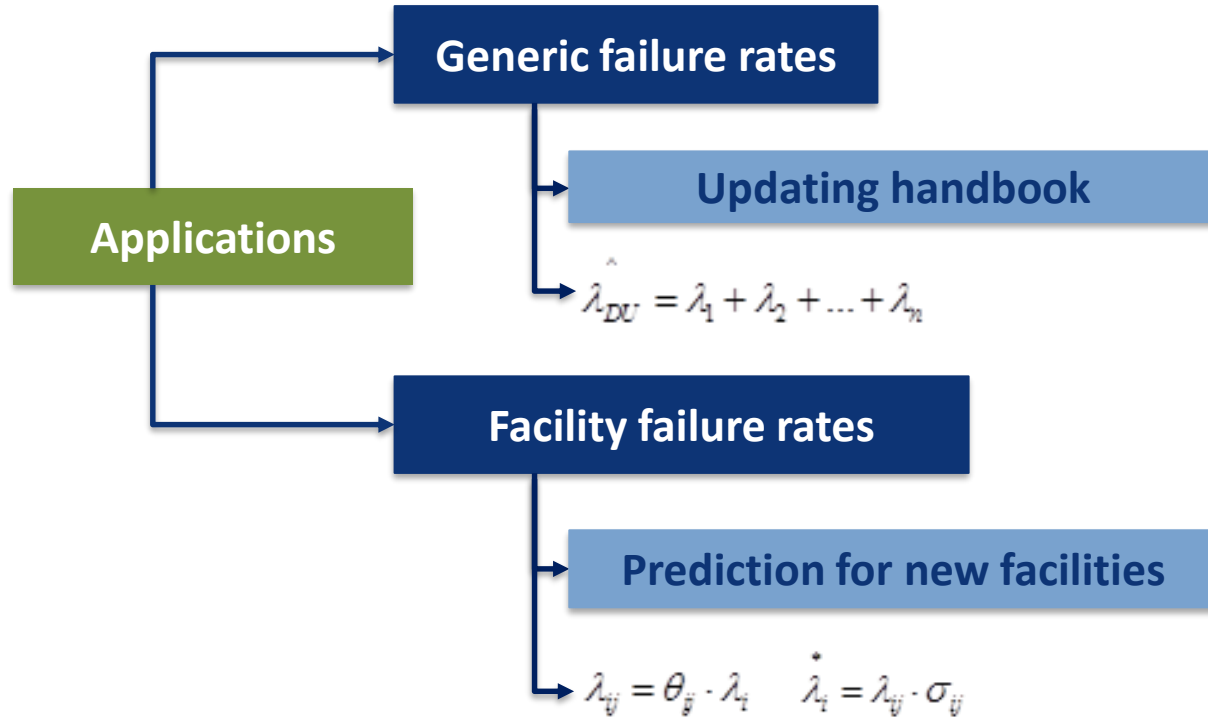

Plots of scaled Schoenfeld residuals against time

Checking goodness of fit for COX model

Modify failure rates

Contributions

- ESREL PAPER_2017

Modified generic failure rates for safety instrumented systems based on operational experience from the oil and gas industry

S. Håbrekke, S. Hauge & Å.S. Hoem
SINTEF, Trondheim, Norway

M.A. Lundteigen & L. Xie
NTNU, Trondheim, Norway

- ESREL PAPER_2018

Adjusted failure rates of safety critical equipment based on inventory attributes

Håbrekke S ¹, Hauge S ¹, Xie L ², Lundteigen M ²
¹ SINTEF Technology and Society, Trondheim, Norway

Challenges

Data collection

Dynamic VS static

Mathematic model

Research framework

Complex Network System

Motivation

Examples

Research questions

Definition

- Complex system
- Complexity

Attributes

- Interdependency
- Large scale

Failures

- Behavior
- Effect

Barriers

- Capacity
- Performance

PhD project

- Supervisor: Yiliu Liu
- Co-supervisor: Mary Ann Lundteign

Literature review

- Identify problems
- Search for theory

Develop methods

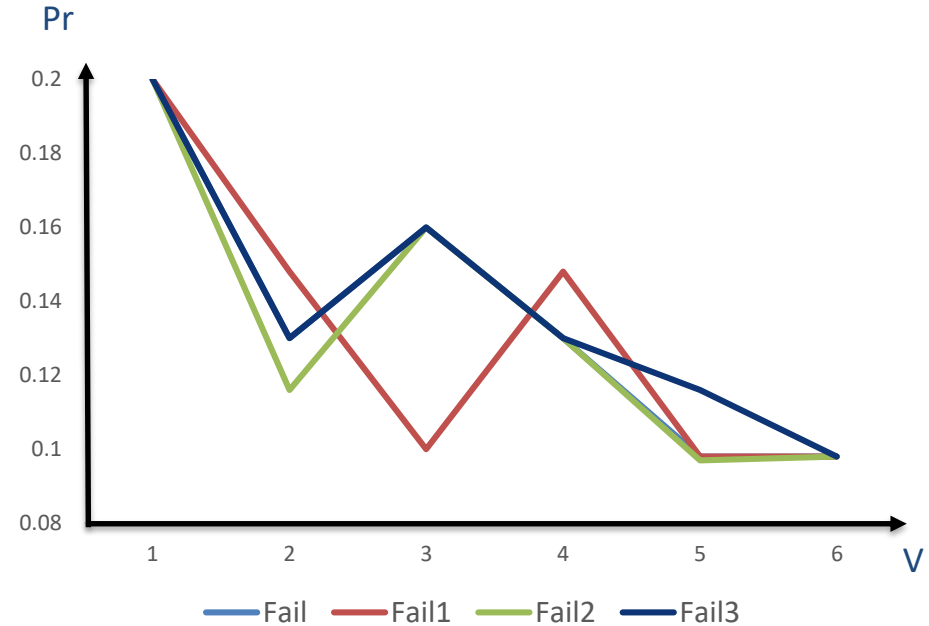

- Develop new model
- Propose new methods

Data analysis and application

- Data analysis
- Applications

Case study

Short term

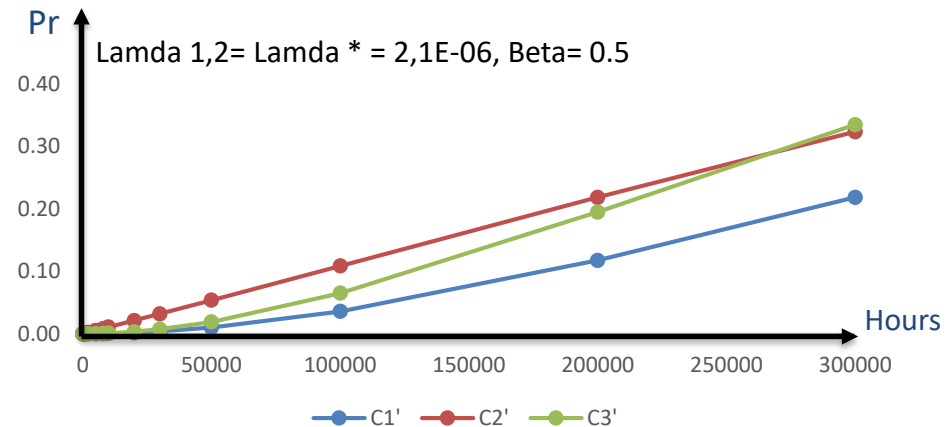

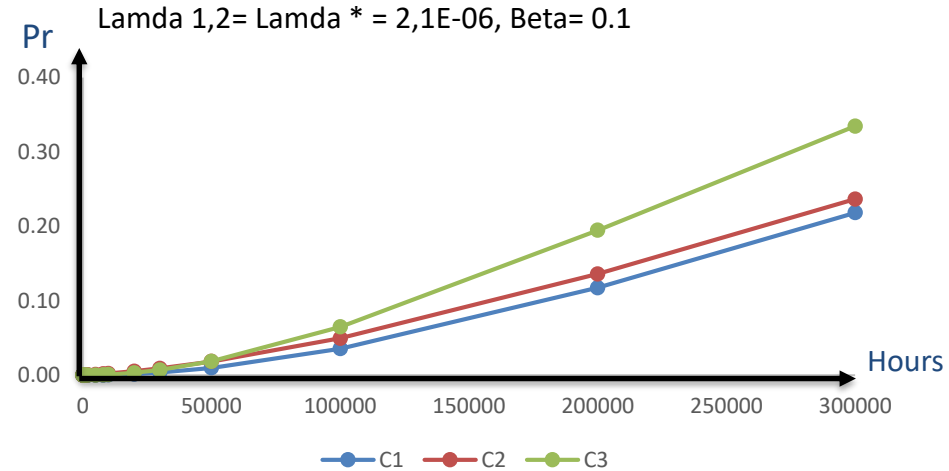

- **Common Cause Failure**

- **Cascading failure**

Case study

Thanks
