

TORGEIR

WHAT'S MY PLAN

I'm currently employed by Bouvet and hired by NTNU as PM for PiF.

I have an agreement with Brønnøysundregistrene (BR) that includes support for a Ph.D. (under certain assumptions). If all goes as planned, I will start working for BR part time while I take my Ph.D. over a period of 4 years.

I'm planning to work with quality in public IT systems, with special emphasis on the increasing complexity in the ecosystem of such IT systems. These topics are of great interest for BR since they are a key actor in implementing central registers and common public IT components in Norway (i.e. Altinn, SERES).
